### Directed Reading Program

From <https://math.unc.edu/undergraduate/opportunities/>: “The Directed Reading Program (DRP) pairs undergraduate students with graduate student mentors for semester-long independent study projects. It is an opportunity for motivated students to get one-on-one mentorship as they learn about a math topic of their interest but is out of the scope of the courses offered at UNC.”

- **Fall 2025:** With Vanessa Almelor. We will follow *Ideals, Varieties, and Algorithms* by Cox, Little, and O’Shea.
- **Spring 2025:** With Yuxin Ge. We learned some basics of Galois theory through Milne’s notes. In particular, we focused on learning about fields and field automorphisms.
- **Spring 2024:** with Yan Zhu. We learned some basic number theory and abstract algebra from Ireland and Rosen.
- **Fall 2023:** with Paul Hamrick. We went through Reid’s *Undergraduate Algebraic Geometry* with a particular focus on the proof of the 27 lines on a cubic.
- **Spring 2023:** with Aryan Kokkanti. ‘Foundations of Knot Theory.’
- **Fall 2022:** with Marleigh Purgar-Mcdonald. ‘Hilbert Nullstellensatz, Affine Varieties and Ideals.’
